## ASEE National Data Collections

Access to the Engineering Data Management System (EDMS) is provided as a service to deans of engineering and engineering technology colleges who annually contribute data to ASEE's database.

If your school contributed data, but does not have access to this system, please contact the Institutional Research and Analytics department at [data@asee.org](mailto:data@asee.org). Corporate Members of ASEE receive access to this program at a discounted rate as part of their membership privileges.

**Profiles 2023 Update:** Validation reports can be reviewed under Help & Files. Corrections can be made until September 30, 2024 by uploading the spreadsheet here: [americansocietyforengineeringeducation.shinyapps.io](https://americansocietyforengineeringeducation.shinyapps.io)

Engineering by the Numbers, 2023 will be released October 11, 2024.

**Survey Opening:** Profiles 2024 is currently open and you can login to see the submission template and register: <https://survey.asee.org>

There are no changes this year and the full instructions are here: <https://ira.asee.org/profiles-of-engineering-and-engineering-technology-instructions/>

**Webinar for Staff New to Profiles 2024:**

Date: September 25, 2024

Time: 3:00 PM ET / 12:00 PM PT

Registration Link: [https://us02web.zoom.us/join/register/WN\\_RvURwyEcRLyzJ3wbz\\_vrEw](https://us02web.zoom.us/join/register/WN_RvURwyEcRLyzJ3wbz_vrEw)

If you're new to the survey process or would like a refresher, we encourage you to attend this informative webinar.

With support from the NSF EEC Award # 2141903, the Multiple Institution Database for Investigating Engineering Longitudinal Development has been migrated to ASEE's EDMS and will be hosted by ASEE moving forward. See here for more details: <https://midfield.asee.org/>

With support from NSF DUE-ATE Award# 2000587, data for engineering technology programs at Community & Technical Colleges has been integrated into the EDMS. Program directors, administrators and chairs at Community & Technical colleges can email [data@asee.org](mailto:data@asee.org) to request access.

## 2024 Four Year Survey

The Profiles Survey is an annual survey conducted by ASEE to collect data on various higher education components for engineering and engineering technology programs. Please see [Profile Instructions](#) for detailed instructions for providing your institution's data.

Register to Participate

If you don't see this under MySurveys, please email [data@asee.org](mailto:data@asee.org) so that your account will be added the role to register.

*Table 1 2022 Profiles Participations Fees*

Institution Type	ASEE Institutional Members	Non-Institutional Members
<b>Doctoral</b>	\$850.00	\$1000.00
<b>Master's</b>	\$510.00	\$600.00
<b>Baccalaureate</b>	\$255.00	\$300.00

*College of Engineering and College of Engineering Technology (2 Separate Colleges)*

Institution Type	ASEE Institutional Members	Non-Institutional Members
<b>Doctoral</b>	\$1700.00	\$2000.00
<b>Non-Doctoral</b>	\$714.00	\$840.00

>Register to Participate

Fill in the billing information (if by CC) and the cost is on the right. Be sure that the total is correct before proceeding. If not, please email [data@asee.org](mailto:data@asee.org)

The complete 2024 Survey is one of the two spreadsheets (see below).

Binary versus Extended Gender: <https://ira.asee.org/profiles-of-engineering-and-engineering-technology-instructions/#gender>

Many of your student and faculty counts will be recorded on a spreadsheet that is available through a download link at the bottom of the page. Before you provide demographic data on faculty and students in your programs, you will have the opportunity to choose the from two different options of gender categories presented as two different download links. This choice will effect every demographic display of the survey.

Gender Category Options:

- Male/Female (Binary Gender Excel Template)
- Male/Female/Non-binary Gender/Another Gender or Unknown (Expanded Gender Excel Spreadsheet)

If you choose the binary gender option spreadsheet, you are reporting data to ASEE as it would be reported to the U.S. Department of Education's Integrated Post-Secondary Education System (IPEDS) survey. Gender for individuals (student or faculty) which is unknown would be reported in a category (male or female) selected by the institution. Under this option, institutions should include counts for **all individuals** in the required cells.

If you select the expanded gender option spreadsheet, every demographic table in the spreadsheet will be displayed with the four gender categories. Please select the most appropriate label that is closest to the way in which your institution collects gender information

This change has been made in response to a request from institutions to reflect their changing student and faculty composition. Please see the [technical review panel discussion from 2016](#) for more information about the collection of gender information at a national level.
